UNIT 2: EMPLOYMENT INTERVIEW

An employment interview is a structured and formal conversation between a job seeker and representatives of a company or organization. During the employment interview, employers aim to understand the candidate's qualifications, skills, experiences, and overall suitability for the position and company's culture. The purpose is to determine whether a candidate is suitable for the job role and the organization.

Types of Employment Interview:

There are several types of employment interviews used by organizations to assess candidates for various job roles. Each type of interview serves a specific purpose and may focus on different aspects of a candidate's qualifications, skills, and fit for the role. Here are some common types of employment interviews:

1. **Structured Interview:** This is the most common type of interview, where the interviewer asks a predetermined set of questions to all candidates. It usually focuses on a candidate's qualifications, skills, and experience.
2. **Behavioral Interview:** In this type of interview, candidates are asked to provide specific examples from their past experiences that demonstrate their skills and abilities. The idea is that past behavior can predict future behavior.
3. **Situational Interview:** Similar to behavioral interviews, situational interviews present candidates with hypothetical scenarios relevant to the job role and ask how they would handle those situations.
4. **Panel Interview:** In a panel interview, the candidate is interviewed by a group of interviewers, typically representing different departments or roles within the company. This type of interview helps gather a variety of perspectives.
5. **Stress Interview:** Stress interviews intentionally create challenging or uncomfortable situations to observe how candidates handle pressure, stress, or difficult questions. The goal is to assess their composure and problem-solving skills.
6. **Group Interview:** Multiple candidates are interviewed simultaneously by one or more interviewers. This type of interview assesses how candidates interact in a group setting and may involve group activities or discussions.
7. **Phone or Video Interview:** These interviews are conducted over the phone or through video conferencing platforms. They are often used as initial screening interviews to assess a candidate's communication skills and overall fit.
8. **Technical Interview:** Used for technical roles (e.g., software development), these interviews assess a candidate's technical skills and knowledge through coding challenges, problem-solving exercises, or technical questions.

3.8 MEETING MINUTES

What Should You Include When Writing Meeting Minutes?

The five steps that you must include are:

1. Pre-Planning
2. Record taking – at the meeting
3. Minutes writing or transcribing
4. Distributing or sharing of meeting minutes
5. Filing or storage of minutes for future reference

1. Pre-Planning Meeting Minutes:

A well-planned meeting helps ensure effective meeting minutes. If the Chair and the Secretary or minutes-taker work together to ensure the agenda and meeting are well thought out, it makes minute taking much easier. For example, depending on the meeting structure and the tools you use, the minutes-taker could work with the Chair to create a document format that works as an agenda and minutes outline as well.

What Is the Agenda of a Meeting?

Meeting agenda = outline:

At the very least, it's important to get a copy of the meeting agenda and use it as a guide or outline for taking notes, setting up your mom format, and preparing the minutes – with the order and numbering of items on the minutes of meeting matching those of the agenda.

In addition, the agenda and/or meeting notice also provides information that will need to be included in the minutes, such as:

- the names of all the meeting attendees, including guests or speakers
- documents that are sent out with the agenda or handed out in the meeting – copies (digital or hard copy) of handouts should be stored with the meeting minutes for future reference and for sharing with those who were unable to attend the meeting (and others as determined by the meeting's Chair).

Clarifying Expectations:

When you take on a new role as minutes-taker or Secretary, be sure to ask the Chair of the committee or Board what their expectations are of your role during the meeting, as well as the type of detail he/she expects in the minutes. For example, if your Board or committee will be dealing with motions, or voting on items/issues, be clear on whether you need to offer names of those making motions, seconding, etc. If you will be dealing with this type of procedures, you (and your Chair)

2. What Should Be Included in Meeting Minutes?

Before you start taking notes, it's important to understand the type of information you need to record at the meeting. As noted earlier, your organization may have required content and a specific format that you'll need to follow, but generally, meeting minutes usually include the following:

- Date and time of the meeting
- Names of the meeting participants and those unable to attend (e.g., "regrets")
- Acceptance or corrections/amendments to previous meeting minutes
- Decisions made about each agenda item, for example:
 - Actions taken or agreed to be taken
 - Next steps
 - Voting outcomes – e.g., (if necessary, details regarding who made motions; who seconded and approved or via show of hands, etc.)
 - Motions taken or rejected
 - Items to be held over
 - New business
 - Next meeting date and time

Tips that might help your note taking:

- **Create an outline** – as discussed earlier, having an outline (or template) based on the agenda makes it easy for you to simply jot down notes, decisions, etc. under each item as you go along. If you are taking notes by hand, consider including space below each item on your outline for your hand-written notes, then print these out and use this to capture minutes.
- **Check-off attendees as they enter the room** – if you know the meeting attendees, you can check them off as they arrive, if not have folks introduce themselves at the start of the meeting or circulate an attendance list they can check-off themselves.
- **Record decisions or notes on action items** in your outline as soon as they occur to be sure they are recorded accurately
- **Ask for clarification if necessary** – for example, if the group moves on without making a decision or an obvious conclusion, ask for clarification of the decision and/or next steps involved.
- **Don't try to capture it all** – you can't keep up if you try to write down the conversation verbatim, so be sure to simply (and clearly) write (or type) just the decisions, assignments, action steps, etc.
- **Record it** – literally, if you are concerned about being able to keep up with note taking, consider recording the meeting (e.g., on your smart phone, iPad, recording device, etc.) but be sure to let participants know they are being recording. While you don't want to use the recording to create a word-for-word transcript of the meeting, the recording can come in handy if you need clarification.

3. The Minutes Writing Process

Once the meeting is over, it's time to pull together your notes and write the minutes. Here are some tips that might help:

Try to write the minutes as soon after the meeting as possible while everything is fresh in your mind.

Review your outline and if necessary, add additional notes or clarify points raised. Also check to ensure all decisions, actions and motions are clearly noted.

Ensure you're including sufficient detail

For Board of Director's minutes in particular, we recommend including a short description of each action taken, as well as the rationale behind the decision

If there was a lot of discussion before passing a motion, write down the major arguments for and against

Edit to ensure brevity and clarity, so the minutes are easy to read

In terms of mom format, here are a few things to keep in mind:

Be objective

Write in the same tense throughout

Avoid using names other than to record motions and seconds.

Avoid personal observations — the minutes should be solely fact-based

If you need to refer to other documents, don't try to summarize them. Rather, simply indicate where they can be found or attach them as an appendix

4. Do Meeting Minutes Have To Be Approved?

Before you share your meeting minutes, make sure that the Chair has reviewed and either revised and/or approved the minutes for circulation. They are not an official record of a meeting unless this has taken place. Depending on your Board, minutes may also be formally approved at the beginning of the next meeting.

5. Distributing or Sharing Meeting Minutes

As the official “minutes-taker” or Secretary, your role may include dissemination of the minutes.
